RE: SMOKING COMPOSITIONS/PM 828/D&O-78-22

Dear George:

I am pleased to advise you that the inventors have executed the formal papers in the above-named application, and we mailed the application to the PT0 on January 31. No changes were made in the final draft received by us on Friday, January 26.

I will advise you regarding the filing details as soon as we have the receipt from the PT0. Is it necessary to file a separate prior art statement since the related art is discussed in the text of the application? Any new art that we find during pendency of the application will be brought to the Examiner's attention.

Thank you again for preparing this application for us.

Very truly yours,

Susan A. Hutcheson
